Date	22 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	2 Marks

Customer Problem Statement :

Employees often face delays and lack of transparency when requesting licensed software through manual processes such as emails or spreadsheets. IT teams struggle with tracking requests, approvals, and license availability. A centralized, automated system is needed to streamline software request management, improve efficiency, ensure proper approvals, and enhance user experience.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 	 I am an Employee who needs licensed software for my work.	 I'm trying to request the installation of required licensed software quickly and easily.	 the current process is manual, time-consuming, and requires multiple approvals.	 there is no automated system to submit, approve, track, and fulfill software installation requests.	 frustrated and my work gets delayed due to the unavailability of the required software.
PS-2 	 I am an IT Support Agent responsible for software installations.	 I'm trying to manage and fulfill software installation requests efficiently.	 requests come through different channels (email, calls, chats) without proper details.	 there is no centralized system to capture requests with required information.	 overwhelmed and unable to prioritize tasks effectively.
