

Ideation Phase

Empathize & Discover

Date	22 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	4 Marks

Empathy Map Canvas:

The empathy map helped identify employee needs, frustrations, and expectations during software request submission. Users wanted a simple, transparent, and fast process with clear status updates. Common pain points included approval delays and manual follow-ups. These insights guided the development of an automated ServiceNow solution that improves efficiency and user satisfaction.
