

Project Design Phase-II
Data Flow Diagram & User Stories

Date	23 June 2026
Team ID	
Project Name	An employee requests installation of licensed software through the Service Catalog
Maximum Marks	4 Marks

Data Flow Diagrams:

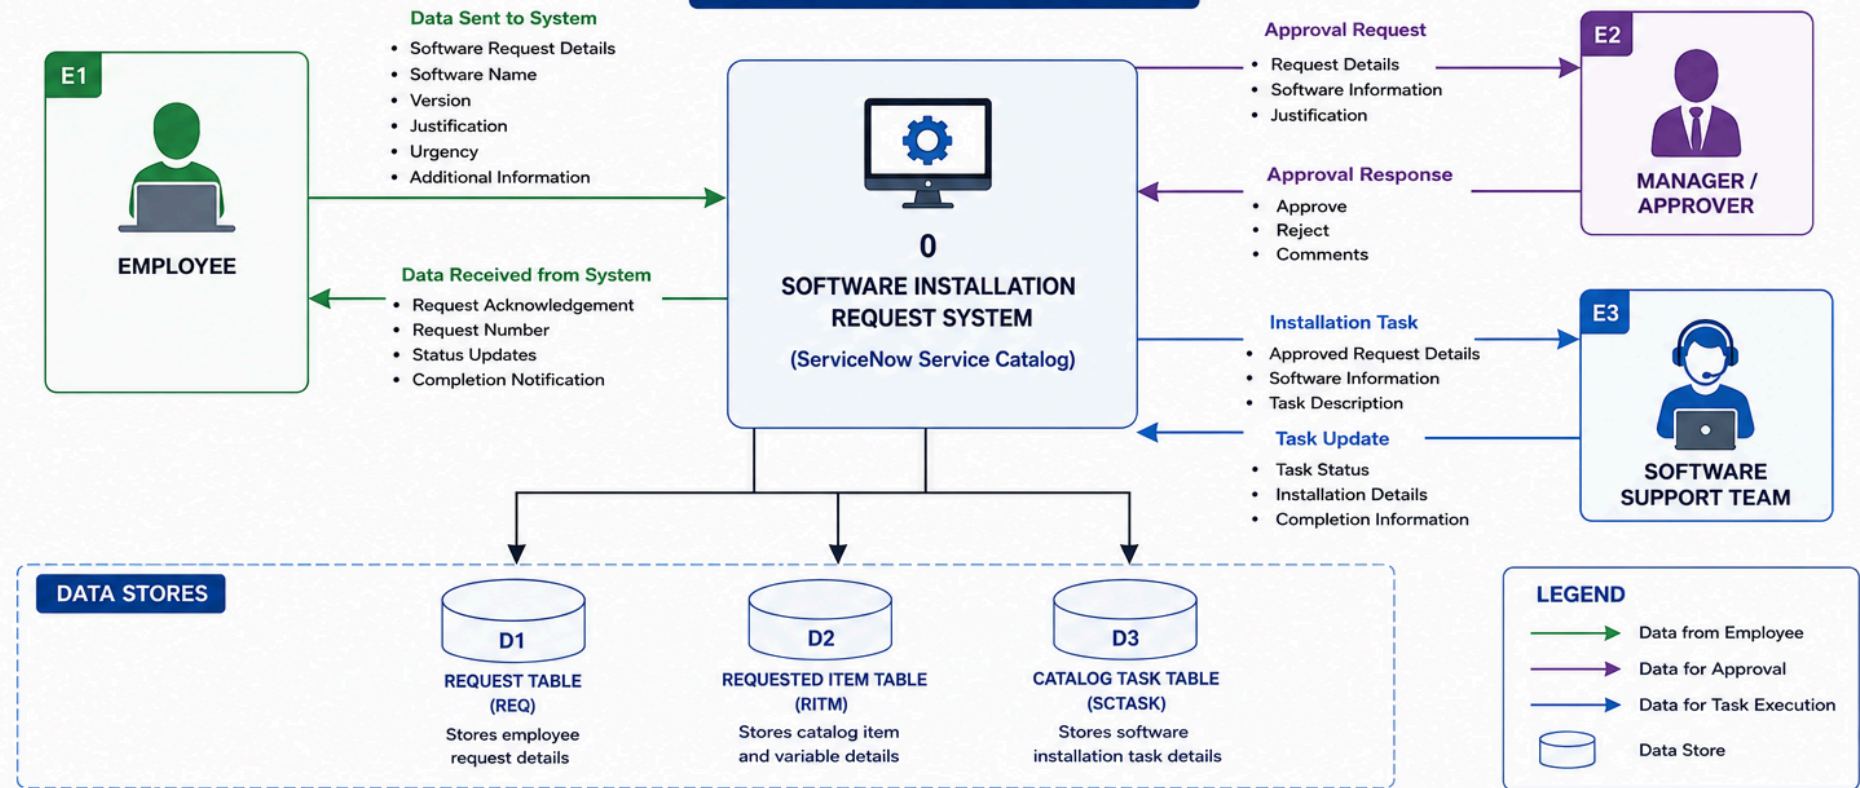

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Process Flow:

Employee

- Submit Software Request
- Service Catalog Item
- Approval Workflow
- Software Support Task
- Software Installation
- Request Closure

LEVEL 0 DFD (CONTEXT DIAGRAM)

PROCESS FLOW OVERVIEW

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
 Employee	Software Request Submission	USN-1	As an employee, I can request licensed software through the Service Catalog by entering required details.	Employee can submit the software request successfully through Service Catalog.	High	Sprint-1
 Employee	Request Details	USN-2	As an employee, I can provide software name, version, justification, and urgency details.	All required catalog variables are captured and saved.	High	Sprint-1
 Employee	Request Tracking	USN-3	As an employee, I can view the status of my software installation request.	Request number and current status are visible in My Requests.	Medium	Sprint-1
 Employee	Notifications	USN-4	As an employee, I receive notifications about request updates.	Email notification is sent automatically for status changes.	Medium	Sprint-2
 Manager / Approver	Approval Process	USN-5	As an approver, I can review and approve or reject software requests.	Approval workflow works correctly and updates the request status.	High	Sprint-1
 Software Support Team	Task Management	USN-6	As IT support, I can receive and complete software installation tasks.	Catalog task is assigned to the team and task status is updated upon completion.	High	Sprint-1
 Administrator	Workflow Management	USN-7	As an admin, I can configure workflows and business rules for automation.	Workflow triggers automatically after request submission and approval.	High	Sprint-2
	Data Management	USN-8	As an admin, I can manage request data across REQ, RITM, and SCTASK tables.	Data is stored correctly in ServiceNow tables without missing records.	Medium	Sprint-2
